Re: *Ex parte* presentation in GN Docket No. 14-28

Dear Ms. Dortch:

On February 4, 2015, Reed Hundt, representing the technology company Adaptive Spectrum and Signal Alignment, Inc. (ASSIA), spoke by phone with Jonathan Sallet, General Counsel of the Commission, to discuss the role of ASSIA's Internet diagnostic and optimization application, Cloudcheck, in enforcing the Commission's forthcoming open Internet rules. Mr. Hundt explained that ASSIA has been discussing with staff the idea that the Commission should not become the "Internet police," and consumers should be able to download free applications that help them enforce the forthcoming rules themselves. The parties discussed how empowering consumers with tools such as Cloudcheck will be particularly important to the extent that the Commission will be relying on consumers to bring complaints about possible rule violations regarding interconnection. Accordingly, Mr. Hundt urged the Commission to state that ensuring compliance with the open Internet order will involve a "bring your own enforcement" effort. Mr. Hundt explained that ASSIA's Cloudcheck is an example of a tool useful for that effort, but the Commission could hold a workshop to discuss the role of similar tools.

Please direct any questions to the undersigned.

Respectfully submitted,

Gerard J. Waldron

Counsel to ASSIA
